

Ahmed Ashraf El-Sayed

.NET Backend Developer

ahmedashraf01085@gmail.com — +20 102 279 8597 — El-Beheira, Egypt

Portfolio — LinkedIn — GitHub

Professional Summary

Junior .NET Backend Developer with hands-on experience building scalable ASP.NET Core Web APIs and MVC applications using EF Core and SQL Server. Strong understanding of Clean Architecture, CQRS (MediatR), and SOLID principles. Experienced in designing secure, maintainable backend systems with a focus on performance, reliability, and clean code practices.

Technical Skills

Backend: ASP.NET Core, Web APIs, ASP.NET MVC, REST, JWT Authentication, Background Services.

Architecture & Patterns: Clean Architecture, CQRS (MediatR), Repository Pattern, Unit of Work, SOLID, AutoMapper, FluentValidation.

Database: SQL Server, T-SQL, Stored Procedures, Indexing, Query Optimization, EF Core, LINQ, Migrations.

Performance & Reliability: Caching, Pagination, Soft Delete, Rate Limiting, Health Checks, Response Compression.

Tools & DevOps: Git, GitHub, Docker, GitHub Actions (CI/CD), Postman, Swagger UI, Serilog.

Testing: Unit Testing, Integration Testing.

Projects

Online Courses Platform – Notifications Microservice

Backend Developer

ASP.NET Core 8, CQRS (MediatR), EF Core, SQL Server, MassTransit/RabbitMQ, Firebase Admin SDK, FluentValidation, Outbox Pattern, Background Workers

- Built a Notifications Microservice using Clean Architecture and CQRS to deliver In-App, Email, and Push notifications.
- Implemented Outbox Pattern + Background Workers with batch processing (10/msg) and polling interval (30s), ensuring reliable async delivery with retries and failure tracking.
- Integrated event-driven messaging via RabbitMQ (MassTransit) and push delivery using Firebase Cloud Messaging (FCM).

Hotel Booking API

Backend Developer

ASP.NET Core 8, Clean Architecture, CQRS (MediatR), EF Core, SQL Server, JWT, FluentValidation, AutoMapper, Serilog, Docker, Stripe

- Built a modular booking system covering hotels, rooms, availability, bookings, reviews, and payments using Clean Architecture.
- Applied CQRS with MediatR, DTO mapping with AutoMapper, and validation with FluentValidation to enforce clean separation and consistency.
- Secured the API using JWT authentication, role-based authorization, and global exception handling for stable production behavior.
- Integrated Stripe test payments, added structured logging (Serilog), and optimized EF Core queries for better performance.

E-Commerce Platform

Backend Developer

ASP.NET Core MVC, EF Core, SQL Server, Identity, Bootstrap, jQuery, Serilog

- Developed core e-commerce modules including products, categories, offers, cart, wishlist, checkout, and order management.
- Implemented authentication and authorization using ASP.NET Identity with roles, email confirmation, and secure session handling.
- Built an admin dashboard to manage inventory and monitor orders with business-focused management features.
- Improved maintainability and performance using structured logging (Serilog), server-side validation, and optimized EF Core queries.

Education

Tanta University

Bachelor of Computer Science and Information Technology

GPA: 3.5 / 4.0

Tanta, Egypt

2023 – 2027 (Expected)
