Professional Summary

Full Stack .NET Developer with hands-on experience building scalable web applications using ASP.NET Core and Angular. Skilled in developing secure RESTful APIs, responsive frontend applications, and enterprise-grade systems using Clean Architecture, CQRS, and role-based access control.

Experienced with SQL Server, Entity Framework Core, JWT authentication, and modern frontend development using Angular, RxJS, and Tailwind CSS. Contributed to production-grade, team-based systems during internships, including microservices and event-driven architectures using RabbitMQ and MassTransit.

Technical Skills

Frontend Development: Angular, TypeScript, RxJS, JavaScript, Tailwind CSS, AJAX

Backend Development: C#, ASP.NET Core, ASP.NET MVC, RESTful APIs, Background Services

Architecture & Design Patterns: Clean Architecture, CQRS (MediatR), Repository Pattern, Unit of Work, Layered Architecture, FluentValidation, AutoMapper, Outbox Pattern

Database Development: SQL Server, T-SQL, Entity Framework Core, LINQ, Stored Procedures, Indexing, Transactions

Authentication & Security: JWT Authentication, Refresh Tokens, ASP.NET Identity, Role-Based Access Control (RBAC)

Distributed Systems & Messaging: Microservices, Event-Driven Architecture, RabbitMQ, MassTransit

Cloud, DevOps & Tools: Git, GitHub, Docker, GitHub Actions (CI/CD)

Testing: xUnit, Moq, Integration Testing, Swagger, Postman

Experience

DIGITAL BUSINESS SYSTEMS (DBS MENA)

Onsite

Full Stack .NET Developer Intern / Feb 2026 – May 2026

- Contributed to building a full-stack Product Management System using ASP.NET Core and Angular.
- Developed secure RESTful APIs using ASP.NET Core, Clean Architecture, CQRS, MediatR, Entity Framework Core, and SQL Server.
- Built responsive frontend features using Angular, TypeScript, RxJS, and Tailwind CSS with route guards, HTTP interceptors, and role-based authorization.
- Implemented JWT authentication, refresh tokens, RBAC, pagination, filtering, product status tracking, and history management features.
- Used Git and GitHub for version control, collaboration, and feature-based development workflow.

CodeWay

Remote

Backend Developer Intern / Sep 2025 – Jan 2026

- Contributed to an Online Courses Platform by developing the Notifications Microservice using ASP.NET Core and SQL Server.
- Implemented event-driven communication using RabbitMQ and MassTransit to consume and process domain events across distributed services.
- Built asynchronous notification workflows supporting In-App, Email, and Push Notifications via Firebase with retry and failure handling mechanisms.
- Applied Clean Architecture, CQRS, Background Workers, Outbox Pattern, FluentValidation, Entity Framework Core and Stored Procedures to build maintainable and scalable backend services.
- Collaborated within a development team using Git, GitHub and Azure DevOps in a remote working environment.

Projects

Hotel Booking API | GitHub

Backend Developer / May 2025 – Aug 2025

ASP.NET Core 8, SQL Server, Clean Architecture, CQRS (MediatR), AutoMapper, EF Core, JWT, Docker, GitHub Actions

- Designed and developed a modular booking system with 40+ RESTful endpoints across 6 core modules (hotels, rooms, offers, availability, bookings, reviews, payments) following Clean Architecture and CQRS principles.
- Implemented JWT authentication, role-based authorization and global exception handling, while enhancing performance using MediatR pipeline behaviors (FluentValidation, caching, Unit of Work), AutoMapper, rate limiting, logging (Serilog), Docker, and CI/CD.
- Integrated Stripe payments end-to-end with idempotent PaymentIntent creation and webhook processing to automatically synchronize booking and payment status.

E-Commerce Platform | GitHub

Fullstack Developer / Aug 2024 – Apr 2025

ASP.NET Core MVC, EF Core, SQL Server, ASP.NET Identity, Javascript, Bootstrap, jQuery, Ajax

- Developed an end-to-end e-commerce system covering products, cart, checkout, and order management.
- Improved user experience using AJAX-based dynamic loading and partial page updates, reducing full-page reloads.
- Implemented secure authentication, query optimization, pagination, logging, Server-Side Validation.

Education

Tanta University

Tanta, Egypt

Bachelor of Computer Science and Information Technology

Sep 2023 – May 2027
