

Ahmed Ashraf El-Sayed

.NET Backend Developer

ahmedashraf01085@gmail.com — +20 102 279 8597 — El-Beheira, Egypt

Portfolio — LinkedIn — GitHub

Professional Summary

Results-driven .NET Backend Developer specializing in building scalable, secure, and production-ready RESTful APIs using ASP.NET Core. Strong expertise in Clean Architecture, CQRS, and Entity Framework Core with solid experience in SQL Server and distributed systems. Experienced in implementing authentication and authorization (JWT), payment integration, CI/CD pipelines, Docker-based deployments, and cloud hosting on Microsoft Azure. Committed to writing clean, maintainable, and testable code with a strong focus on performance, reliability, and best engineering practices.

Technical Skills

Backend Development: ASP.NET Core, Web APIs, ASP.NET MVC, RESTful APIs, Background Services.

Architecture & Patterns: Clean Architecture, CQRS (MediatR), Repository Pattern, Unit of Work, FluentValidation.

Database: SQL Server, Azure SQL, T-SQL, Stored Procedures, Indexing, Transactions, Query Optimization, Entity Framework Core, LINQ.

Security: JWT Authentication, Role-Based Authorization, ASP.NET Identity, Secure Session Configuration.

Cloud & DevOps: Microsoft Azure (App Service, Azure SQL), Docker, GitHub Actions (CI/CD), Environment Configuration, Production Deployment.

Performance & Reliability: Caching, Pagination, Rate Limiting, Health Checks, Response Compression, Global Exception Handling.

Testing: Unit Testing (xUnit, Moq), Integration Testing, Mocking, Testable Architecture.

Projects

Hotel Booking API

Backend Developer

ASP.NET Core 8, Clean Architecture, CQRS (MediatR), EF Core, Azure SQL, JWT, FluentValidation, Docker, GitHub Actions, Microsoft Azure

- Designed and built a production-ready .NET 8 RESTful Hotel Booking API using Clean Architecture and CQRS, with clear separation of Domain, Application, and Infrastructure layers.
- Implemented JWT authentication with role-based authorization (Customer, Manager, Admin), along with global exception handling and API versioning.
- Integrated Stripe payments end-to-end with idempotent PaymentIntent creation and webhook processing to automatically synchronize booking and payment status.
- Improved performance and reliability using MediatR pipeline behaviors (validation, caching, Unit of Work), rate limiting, response compression, structured logging (Serilog), Docker deployment, and CI/CD automation.

Online Courses Platform – Notifications Microservice

Backend Developer (Team-Based Project)

ASP.NET Core 8, SQL Server, CQRS (MediatR), EF Core, MassTransit, RabbitMQ, Firebase, Outbox Pattern

- Built an event-driven Notifications Microservice using .NET 8, MassTransit, and RabbitMQ to consume domain events with retry policies and correlation IDs for scalable inter-service communication.
- Designed multi-channel notification delivery (In-App, Email, Push via Firebase) with user preference management and device registration support.
- Implemented the Transactional Outbox pattern with background workers and retry tracking to ensure reliable, fault-tolerant message delivery.
- Structured the service using Clean Architecture and CQRS, applying FluentValidation, Unit of Work, EF Core, and stored procedures for complex workflows.

E-Commerce Platform

Fullstack Developer

ASP.NET Core MVC, EF Core, SQL Server, ASP.NET Identity, Bootstrap

- Developed an end-to-end e-commerce system covering products, categories, cart, checkout, and order management using ASP.NET Core MVC and EF Core.
- Applied Repository and Unit of Work patterns to ensure maintainable architecture and clear separation of concerns.

- Implemented secure authentication and role-based authorization (Admin/Manager/User) with ASP.NET Identity and secure session handling.
- Enhanced performance and production-readiness through query optimization, pagination, structured logging, validation, and Docker-based deployment.

Education

Tanta University

Bachelor of Computer Science and Information Technology

GPA: 3.5 / 4.0

Tanta, Egypt

2023 – 2027 (Expected)

Languages

Arabic: Native

English: Professional Working Proficiency
